OBJECTIVE

Final year B.Tech CSE (AI & Data Science) student at BML Munjal University seeking a Data Analytics role. Hands-on with two end-to-end analytics platforms spanning data mining, SQL, Python, and Excel, combined with live Data Analyst and Business Development internship experience building dashboards, driving stakeholder decisions, and supporting growth-oriented reporting.

EDUCATION

Bachelor of Technology, Computer Science Engineering (AI & Data Science)

2023 – 2027

BML Munjal University, Gurugram

Final Year

Relevant Coursework: Machine Learning, Database Management Systems, Data Structures & Algorithms, Statistics

EXPERIENCE

Udaghosh Social Welfare Society

July 2026 – Present

Data Analyst Intern (Remote)

- Collect, clean, and analyze data from multiple sources to surface trends, patterns, and business-relevant insights.
- Build interactive dashboards and automate recurring reporting workflows in Excel, Power BI, SQL, and Python.
- Perform statistical analysis and monitor KPIs to support stakeholder decision-making across cross-functional teams.

Contentora Media

July 2026 – Present

Business Development Intern (Remote)

- Research and identify potential clients, advertisers, sponsors, and strategic partners; assist in lead generation via LinkedIn, email campaigns, and online networking.
- Support the creation of pitch decks, sales presentations, and partnership proposals; maintain CRM systems with accurate prospect data.
- Conduct competitor and industry trend analysis, and prepare reports on outreach performance and sales pipeline.

SKILLS

Core Competencies

Data Mining, Data Wrangling & Cleaning, ETL, Predictive Modeling, Statistical Analysis, Data Visualization, Business Intelligence, Report Automation

Analytics & BI

Power BI, Excel (Pivot Tables, Solver, Forecast Sheet)

Languages

Python, SQL (PostgreSQL / MySQL / MariaDB), R (Basics)

ML & Data Science

Scikit-learn, SHAP, Pandas, NumPy, Statsmodels, mlxtend

Dashboarding

HTML/CSS/JS, Chart.js, Plotly, Streamlit, DuckDB

Tools

Git, GitHub, Jupyter, Google Colab, VS Code, openpyxl, Apify

PROJECTS

Profitara — Retail BI & Customer Analytics Platform. [\[GitHub\]](#)

- Built an end-to-end retail analytics pipeline on 10,000 transactions (4,918 orders, 1,448 customers) across 9 categories and 17 sub-categories, generating Rs. 66.95L revenue at 4.15% margin.
- Developed a Random Forest CLV model ($R^2 = 0.930$) and a Logistic Regression churn classifier (AUC = 0.91, 85% accuracy) flagging 361 at-risk customers (24.9% of base) for win-back targeting.
- Applied K-Means segmentation (silhouette = 0.611) to identify 119 high-value "Champion" customers, Apriori market-basket analysis surfacing 52 cross-sell rules, and Isolation Forest for discount-abuse detection.

Naukri Saaf — Ghost Job Listing Detection Platform. [\[GitHub\]](#)

- Built an end-to-end ML pipeline on 2,851 real job listings scraped via Apify from LinkedIn, Indeed, and Glassdoor, flagging 29.3% as likely ghost postings under a weak-supervision labeling scheme.
- Benchmarked 5 classifiers (Gradient Boosting, Stacking Ensemble, Random Forest, Logistic Regression, MLP); best model (GBM) achieved 0.72 AUC, explained via SHAP with `days_live` and `employer_repost_count` as top predictive features.
- Shipped a Chrome extension that runs live on Indeed job listing pages, extracting posting signals in-browser and flagging likely ghost listings in real time as recruiters/candidates browse.

CERTIFICATIONS

Microsoft Power BI Data Analyst (PL-300 Prep) — Microsoft Learn
